This is a reference guide for the office manager, surgical planner/scheduler or physician as an aid in smoothly registering a new patient into the PtoleMedic System database.

WARNING: Please note that the use of MRI scanners in patients with metallic implants in or near the knee joint may adversely affect the quality and accuracy of the images obtained. It is recommended that MRI scans not be performed, please verify the MRI order with the physician.

WARNING: Making custom cutting guides in pediatric patients has not been studied and the results of the use of this product in these patients is unknown. For this reason, it is generally recommended that such patient not be entered into the patient database. Please verify this request with the ordering physician.
